

# NITRILE COAT PIPE SUPPORT

Product information sheet

### EIC-22 • Thermal Insulation

# NITRILE COAT PIPE SUPPORT

PUF Pipe Supports with 5 mm Nitrile Coating are engineered to provide strong, stable and reliable support for insulated piping systems.

#### Material:

**Primary use:** PUF Pipe Supports with 5 mm Nitrile Coating are primarily used for supporting and protecting insulated pipes in industrial piping systems.

## Product overview

The high-density PUF (Polyurethane Foam) core provides excellent load-bearing and insulation support, while the 5 mm thick Nitrile rubber coating offers enhanced protection against moisture, oil, chemicals, abrasion and harsh industrial conditions.

## Applications

- HVAC & Chilled Water Systems
- Refrigeration & Cold Insulation
- Oil & Gas Pipelines
- Chemical & Process Industries
- Petrochemical Plants
- Power Plants
- Industrial Utility Piping
- Steam & Hot Water Pipelines
- Fire Fighting & Water Piping
- Pipe Racks & Structural Supports

## Key features

- High-Density PUF Support
- 5 mm Nitrile Rubber Coating
- Excellent Load-Bearing Capacity
- Oil & Chemical Resistant
- Moisture & Abrasion Resistant
- Vibration Reduction
- Protects Pipe Insulation
- Long Service Life
- Suitable for Industrial Piping Systems

## Available options / specifications

**Contact EIC for available specifications.** Share your size, thickness and quantity and EIC will confirm the options available for NITRILE COAT PIPE SUPPORT.
